The experience speaks for itself™

## DATASHEET

### Dragon NaturallySpeaking® 10 Preferred

Create Email, Documents and Spreadsheets – All by Voice

Dragon NaturallySpeaking 10 Preferred gives small business and advanced PC users the power to create documents, reports

and emails three times faster than most people type. All with up to 99% accuracy. Surf the Web by voice or dictate and edit in Microsoft Word and Excel, Corel WordPerfect and most other Windows-based applications.

New Dragon Voice Shortcuts reduce common multi-click tasks to simple voice commands. Create custom commands to insert blocks of text or bitmaps – such as name, title and signature – with a single voice command. Format and delete text faster than ever with Quick Voice Formatting. Work with a Bluetooth microphone if preferred and even dictate into a digital recorder when away from the PC.

### Accurate speech recognition for PC applications

**Unprecedented Speech Recognition Accuracy** • Dragon NaturallySpeaking 10 offers accuracy levels that are unrivalled in desktop speech recognition, with up to 20% fewer speech recognition errors out of the box than Version 9 and with around half the amount of errors that the product delivered just five years ago. Dragon NaturallySpeaking users gain the added benefit of avoiding spelling errors and typing mistakes. In fact, the product actually learns from your corrections over time, making speech a more natural and satisfying experience.

### Supports UK English spelling

**Works With the Applications Users Already Have** • Dictate directly into Microsoft Word and Microsoft Outlook Express, as well as most other Microsoft Office applications running on Microsoft Windows XP, Windows 2000 and Windows Vista. Dragon also supports popular programs such as Corel WordPerfect, Microsoft Internet Explorer, Mozilla Firefox and AOL. You even control menus and dialog boxes in these applications. Navigate the desktop by voice: launch or switch applications, save or print documents and more – all by voice.

### Create and edit documents and messages

**NEW User Interface** • Dragon NaturallySpeaking 10 introduces new graphical icons to enhance the DragonBar user interface, making the product even easier to use.

**Add Custom Words and Voice Commands** • Quickly add custom words, such as proper names, to the system's vocabulary. Personal commands can also be created, such as "insert signature" and pre-set text and images will automatically appear in email and documents.

**Easy Correction and Proofing** • The "playback" feature enables you to listen to your dictation while Dragon highlights the corresponding text on the screen for easy proofreading.

## USER BENEFITS

### Faster than Typing

Most people speak more than 120 words per minute but type less than 40 words a minute. That means you can create documents and email messages more than three times faster using Dragon NaturallySpeaking 10 Preferred. The software never makes a spelling mistake and it actually gets smarter the more it's used.

### Fun and Easy to Use – Get Started Right Away

Dragon NaturallySpeaking installs quickly and requires no special script reading. New on-screen help and tutorials help you become an expert user in no time – dictate letters and emails instantly! A comfortable, high-quality headset is included.

### Bluetooth Support

Dragon NaturallySpeaking with a Nuance-approved Bluetooth headset (not included) provides great dictation results – without the wires.

### Avoid Repetitive Strain Injuries

Using voice to control the PC and create documents reduces the risk of developing repetitive strain injuries, such as carpal tunnel syndrome.

## SYSTEM REQUIREMENTS

- CPU: Intel® Pentium® / 1 GHz processor or equivalent AMD processor. Faster processors will yield faster performance • Memory: 512 MB RAM (1 GB RAM for Windows Vista™) • Free hard disk space: 1 GB (2 GB for FIGSD Localised Editions)
- L2 Cache: 512 KB • Supported Operating Systems: Windows Server 2000, Windows Server 2003, Win XP SP2 or higher - 32 bit - Home & Prof, Win 2000 SP4 or higher, Windows Vista™ or Windows Vista™ SP1, 32-bit (all 4 editions) • DVD-ROM drive (required for installation) • Microsoft® Internet Explorer 6 or higher (free download available at [www.microsoft.com](http://www.microsoft.com)) • Nuance-approved noise-cancelling headset microphone (included) • For Bluetooth wireless microphone support, please visit <http://support.nuance.com/compatibility/> • Creative® Labs Sound Blaster® 16 or equivalent sound card supporting 16-bit recording • A Web connection is required for activation • Speakers (required for playback of recorded speech and text-to-speech features).

During the install process, the software checks to make sure your system meets these minimum requirements. If your system does not meet the requirements, the software will not be installed.

## RECOMMENDED SPECIFICATIONS

- CPU: Intel® Pentium® / 2.4 GHz processor (1.6 GHz dual core processor) or equivalent AMD processor • Memory: 1 GB RAM • L2 Cache: 1 MB

This edition of Dragon is not certified for dictation directly into Electronic Medical Record (EMR) Systems. For EMR support, please use Dragon Medical Edition.

Dragon NaturallySpeaking has won over 175 awards worldwide.

**NEW Quick Voice Formatting** commands allow you to issue a single voice command, such as “Bold Quick Voice Formatting”, to make formatting and deleting text faster than ever. In addition, the extensive set of Natural Language Commands avoids the need to memorise complex instructions. In Word, for example, just say “make that bigger” and the font size increases instantly.

## Send email, Instant Messages and surf the Web – all by voice

**Browse the Internet with Ease** • Search the Web, access information and navigate Web pages, simply by speaking URLs and links.

## Dragon Voice Shortcuts to perform tasks faster than ever

**NEW Dragon Voice Shortcuts for Web Search** make searching the Web faster and easier. By saying a command containing desired search words, such as “Search the Web for financial management resources”, or “Search maps for Italian restaurants in Central London”, Dragon NaturallySpeaking 10 will use the default search engine and Web browser to enter your dictated term(s) in the search field and return the results. You may also search specific sites or search the Web for a specific type of information using commands such as “Search Wikipedia for William Shakespeare”, or “Search eBay for Bluetooth headsets”. Sites supported by Dragon Voice Shortcuts include Google, Yahoo, eBay, Wikipedia and YouTube.

**NEW Dragon Voice Shortcuts for Desktop Search** introduces commands to search the computer as directly as the Web, by dictating the word(s) to find documents, emails and web browsing history. For example, by saying “Search computer for launch plans”, Dragon will complete the search using Google Desktop or Windows Vista desktop search. In addition, commands such as “Find an email about the Robinson report” directly open the top email containing the dictated keywords. Searching the computer has never been faster – or easier.

## Dictate into a handheld recorder for later transcription

**Be Productive on the Move** • When away from the office, dictate into any Nuance-certified digital recorder for automatic transcription when synched with a PC.

## ABOUT NUANCE COMMUNICATIONS

Nuance is the leading provider of speech and imaging solutions for businesses and consumers around the world. Its technologies, applications and services make the user experience more compelling by transforming the way people interact with information and how they create, share and use documents.
