

### ▷▷ **Portable Dictation Machine Sh 10**

Used in or out of the office, the Sh10 is cost effective, user friendly and very reliable. The slide switch allows for one handed operation of the machine. This "simple" dictation machine also comes with all the advantages of the StenoTape Professional.

Colour: titanium

#### **Functions:**

- Slide switch operation
- Separate record button
- Transit lock
- Fast forward and rewind
- Quick erase
- Warning signals for missing set, tape end and weak battery
- Automatic motor shut-down at the end of the tape
- Battery, rechargeable battery and mains operation, recharging in the device
- Recommended playback station: St 3211

### ▷▷ **StenoTape Professional Steno-Cassette 30**

The StenoTape Professional corresponds to the normed standard „Steno-Cassette 30“ and is at the heart of Grundig Business Systems analogue range. Developed specifically for dictation, the cassette is small, robust and designed to provide the best possible sound quality. StenoTape Professional is a single sided tape which helps prevent accidental deletion, over recording and the retyping of previously transcribed dictation. The capstan drive ensures a constant tape speed to reduce distortion and the integrated time scale provides the author and typist with a visual indication of the tape status. StenoTape Professional has space for 30 minutes of recording. Thus the amount of dictation time required for processing can be determined at any point.
