Keeping up with Microsoft

Microsoft has recently introduced a new operating system, Windows 7. Many of our customers are migrating across to this new system. Winscribe version 4.0 has been certified for Windows 7.

Terminal Service (TS)

Version 4.0 gives all TS users a TS solution that is simple to implement. We can easily demonstrate this system in your office.

BlackBerry

Winscribe continues to keep up with new BlackBerry models and OS changes.

NEW hardware

Philips wireless!!

For a long time now we have been waiting for Philips to produce a wireless Speechmike. The Speechmike series have been great performers over the years. The AIR will give you the solid recording quality and simple functionality you expect from a Speechmike plus **no more wires**.

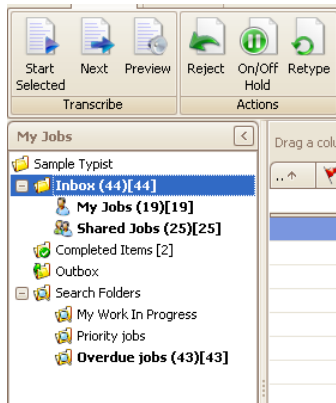

Winscribe V 4.0

WinScribe, the market innovator in digital dictation, transcription, and workflow management solutions recently announced the release of the newest version of its award-winning digital dictation workflow management suite: WinScribe Dictation Version 4.0.

WinScribe Dictation Version 4.0 has many new key features, including a new secretary client that provides easier identification on dictations, easier team working, and an enhanced dictation job filtering option. WinScribe has enhanced its mobility suite with this release as well. It is now possible to upload dictations from WinScribe's popular dictation application for BlackBerry Smartphones using the BlackBerry device as a USB

device. This grants users the ability to quickly upload dictations captured on the device without having to rely on wireless signal strength or availability in order to do so.

If you would like a demonstration please contact us on 02-9231-5161 or email us at sales@pcdictation.com.au

Winscribe 4.0 in more detail

Winscribe Client: This replaces the internet typist. It allows the typist (depending on security level) to: retrieve completed jobs, move jobs to other typing groups, check who is logged on, run reports, import audio files, 'chat' to other typists on line and attach word documents to audio files.

Winscribe Author: The Author program has some added features. If the Author selects a typist to send work to, the program will now indicate whether the typist is online. The Author Importing feature allows the user to send work not only via a 'Speechmike' but also audio captured by their telephone system, MP3 player etc.

Terminal Services: While TS has been part of the Winscribe system since version 3.7, there is now a simple install application. The Winscribe server is longer required on the TS server.

Conference recordings: Winscribe have developed a recording application that can send packets of dictation (2-3 + minutes) to the typing pool that will allow board meetings/interviews etc to be transcribed. Where you have a need for quick turnaround you can distribute this work to several typists.

Software assurance solutions (SAS)

The annual SAS payment gives you the reassurance that your investment will stay up-to-date. PC Dictation maintains a low cost SAS policy.

Winscribe Author application is now available for BlackBerry Bold 9000 with available WiFi and 3G connectivity for faster upload of voice files.

Winscribe hands free

Winscribe allows you to use virtually any digital device. Here are some hands free options.

Hands free dictation with USB foot pedal and wireless headset.

Cost \$550

The Philips 'AIR' wireless will give our Speechmike users some extra flexibility. It has a 10 meter range, very useful in places where the Author is moving around the office [Radiology, Pathology]

Cost \$700

Olympus DS 5000 is one of our most popular portable recorders.

The Author can use this device as a portable hands free device by using the Voice Activation setting.

\$700
