

# PC DICTATION

YOU TALK WE LISTEN

December 2009

## Conference recorders

We have just released a new line of conference recorders including video+audio. The zoom devices are professional equipment at a very affordable price. Please take a look at our website, click on the 'conference recorders' link.

## iPhone?

The requests keep coming, when can I get an app for my iPhone? Next year we will have a product by Winscribe. If you are interested please send us an email or call. We plan to send out the brochures early next year.

## Dragon Tips

### Improve your recognition:

Run the acoustic and language model optimiser every week, this will improve your accuracy rate. Go to 'accuracy centre'.

### Add new Command

Why type *Australian Securities and Investments Commission* when you can say ASIC and let your machine type the whole phrase. Commands allow you to make dictation very easy. Go to Tools, add new command.

### Better Headset? Wireless?

If you started out using the headset that came with Dragon and feel your recognition could be better, maybe the Plantronic 400 or GN wireless headsets might be a better option. Call us and we can go through a couple of tests.

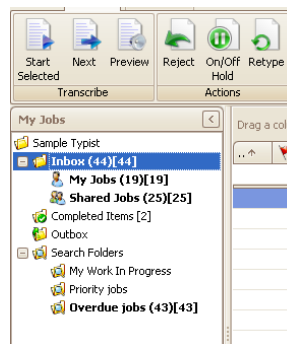

## Winscribe V 4.0

WinScribe, the market innovator in digital dictation, transcription, and workflow management solutions announced recently the release of the newest version of its award-winning digital dictation workflow management suite: WinScribe Dictation Version 4.0.

WinScribe Dictation Version 4.0 has many new key features, including a new secretary client that provides easier identification on dictations, easier team working, and an enhanced dictation job filtering option. WinScribe has enhanced its mobility suite with this release as well. It is now possible to upload dictations from WinScribe's popular dictation application for

BlackBerry Smartphones using the BlackBerry device as a USB device granting users the ability to quickly upload dictations captured on the device without having to rely on wireless signal strength or availability in order to do so.

If you would like a demonstration please contact us on 92315161 or email us at sales@pcdictation.com.au

## Philips Speechmike AIR

For a long time now we have been waiting for Philips to produce a wireless Speechmike. The Speechmike series have been a great performer over the years. The AIR will give you the solid recording quality and simple functionality plus no more wires.

Whether you use Philips Pro software or you are a Winscribe user, the Philips AIR will have to be on your next purchase order. If you are interested, we will have a demonstration model in our showroom soon or we can come to you to discuss how the

Philips AIR can improve your work flow.

## Updates for digital devices

Philips PRO dictate and transcribe. The latest version is V5.0 B43D.

Contact us to get the download.

Olympus Pro 5 dictate and transcribe. Version 5.0.8 is the latest version. We recommend this version as it fixes some email issues. Click your software update button.
