

DR-2000

Combining simplicity with innovation ...

Stylish and easy to use, the DR-2000 is perfect for both left or right-handed users and is part of the "Directrec" range of desk-based dictation systems.

The DR-2000 is supplied with DSS Player Pro software. The optional AS-4000 Transcription Kit makes it excellent for use by secretarial staff.

DIRECTREC

Delivering outstanding performance, a highly sensitive microphone ensures everything is recorded in exact detail whether the device is being used for dictation or conference recording. The innovative design also ensures the speaker is not obstructed during use which means it is capable of operating at high volume – useful when recording in noisy environments.

As it records directly to a PC, there is also no need to worry about storage capabilities or additional accessories. The optional audible command “beeps” also makes the device equally useful for the visually impaired.

Main Features:

- Symmetrical design makes it easy to use by either left or right-handed users
- Optional audible “command beeps” assists the visually impaired
- Highly sensitive microphone delivers excellent quality recordings in a variety of environments
- Speaker position provides crystal clear sound quality
- Loudspeaker gives outstanding performance even in noisy surroundings
- DSS Player Pro software
