

- Recording in Digital Speech Standard Pro (DSSPro)
- Ergonomically designed: Large backlit LCD, NEW button and three Smart Buttons
- Professional editing functions such as Insert or Overwrite dictation and Partial Erase
- SDHC card slot that allows almost endless recording capacity: e.g. over 157 hours recording with the supplied 1 GB SD Card
- Up to 5 folders for file management (holding max. 200 files each)

Flexible mobility and high-performance

This sleek and elegant digital voice recorder is specially designed for small enterprises. Up to 200 files can be saved in each of the five folders and an SDHC Card slot ensures ample storage capacity. Recordings are saved in the high-quality DSSPro format and users have the choice of various recording modes including the new extra-high-quality QP mode. Files can be downloaded quickly and easily to a PC or Mac via Hi-Speed USB and integrated in the office workflow thanks to the included DSS Player software.

Olympus Professional Dictation Systems also deliver enhanced workflow solutions for medium and large enterprises. Please visit the Olympus website for more information. www.olympusproline.co.uk

AS-2400

For dedicated transcription needs, Olympus offers the optional AS-2400 Transcription Kit which includes a footswitch and headset for hands-free operation. The AS-2400 guarantees easy transcriptions of any DSSPro recordings. Data can be labelled according to importance or priority and files can be viewed at any time. It allows easy transfer from the voice recorder to the secretary's office. Besides the DSS Player Standard Transcription Module, the kit also includes the RS-28 footswitch and the E-102 stereo headset to make hands-free operation of the DS-2400 possible.
